- 6) ImageTune™ program has been successfully installed. Press the [COMPLETE] button to exit the install program and restart the computer.

Caution

! For detailed user's guide for ImageTune™, please refer to help of ImageTune™ program or User's guide of ImageTune™.

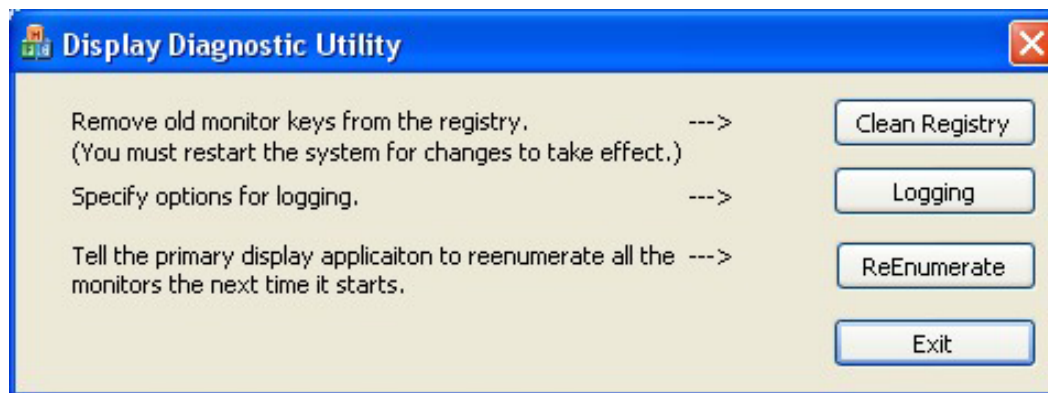

- When turning the power off/on while ImageTune™ program is executed, the program may not be operated normally.
- When changing the vertical frequency or the resolution, please change it after finishing ImageTune™ program.
- Do not execute ImageTune™ program while adjusting the screen. Otherwise, the internal data of the monitor may be changed.
- If not, the program couldn't be executed as the user desires due to the discrepancy between the internal data of the monitor and program data.

If the program is restarted, it will be executed normally since it reads the changed data.

How to clean registry

This will be included in ImageTune program and be located in C:\program Files\portrait displays\ImageTune.

1) Selecting Clean Registry prompts the user with the following dialog.

2) Click "Yes", then it will initiate the clean registry process and then restart the computer.
